Credit Name: CSE 2140 2nd Language Programming
Assignment Name: Chapter 4 Mastery, QuadraticEquation.java

The following questions can help you in thinking critically about your problem-solving processes:

Understanding the Problem
How did you approach understanding the challenge?
Understanding how to put quadratic formula into code
Were there any parts of the problem you found confusing at first? If so, how did you resolve that confusion?
Finding the square root was a bit confusing

Planning the Solution
Did you create a plan or break the problem into smaller steps before coding?
I broke it into input//process//output//
How did you decide on the tools, data structures, or algorithms to use?
Used double and math.sqrt() for the math part

Implementation
Did you write the code in small pieces or attempt the entire solution at once?
wrote the code in small steps, starting with scanner
How did you test your solution along the way to make sure it was working?
After writing few lines, i ran the program with simple numbers to check the output

Overcoming Challenges
What part of the problem was the most difficult for you?
Separating the tens digit
How did you handle moments when you felt stuck or unsure of what to do next?
looked back at quadratic formula

Learning
Was there anything you learned that you think will help you with future challenges?
learned more about how to use math.sqrt()
