

Include your IPO Chart with your code in Eclipse IDE: We will discuss and demonstrate this in the computer lab.

IPO CHART

Program name:	[PackageCheck.java]	
INPUT	PROCESS	OUTPUT
Hint: What will the user input?	Hint: What is the program going to do with the input information?	Hint: What will the screen display after user input?
user enters a value for kg, length, width and height	get and store users numbers calculate the volume of the package (length * width * height)	If kg = more than 27 and volume = more than 100,000 cubic centimeters ,then output "Too heavy and too large" else if kg = more than 27, output "too heavy" else if volume is more than 100 000cm3, output "too large" Else just output "Your package is accepted"
