

Credit Name: CSE 2140 2nd Language Programming
Assignment Name: Chapter 3 Mastery, ThreeDigit.java

The following questions can help you in thinking critically about your problem-solving processes:

Understanding the Problem

How did you approach understanding the challenge?

Understanding how number splits into hundreds tens and ones

Were there any parts of the problem you found confusing at first? If so, how did you resolve that confusion?

Finding the middle tens digit was a little bit confusing

Planning the Solution

Did you create a plan or break the problem into smaller steps before coding?

I broke it into input//process//output//

How did you decide on the tools, data structures, or algorithms to use?

Used simple math operators, /100 for hundreds /10 %10 for tens and %10 for ones

Implementation

Did you write the code in small pieces or attempt the entire solution at once?

wrote the code in small steps, starting with scanner

How did you test your solution along the way to make sure it was working?

After writing few lines, i ran the program with simple numbers to check the output

Overcoming Challenges

What part of the problem was the most difficult for you?

Separating the tens digit

How did you handle moments when you felt stuck or unsure of what to do next?

looked back at previous program with digits

Learning

Was there anything you learned that you think will help you with future challenges?

learned more about how to use / and % together
